UNIVERSITIES

There are in India three types of university: *Affiliating; Affiliating and Teaching;* and *Teaching* or *Residential and Teaching*. The affiliating universities, such as Agra, Jammu and Kashmir and Bihar, have no university teaching departments and in most cases no constituent colleges (colleges run directly by the university). The affiliating and teaching universities, such as Bombay, Calcutta and Madras, have their own teaching departments or constituent colleges, or both, but also affiliate other independent colleges. The teaching and residential teaching universities have no affiliating functions.

It is not possible, for reasons of space, to give lists of professors at all the colleges affiliated to the various universities, though some very eminent professors may be attached to them, but those attached to central teaching staffs are listed wherever possible.
